Dear Len,

It has come to my attention that TRENT Security was being paid by The Board for protection at the above location. If this is the case I would appreciate some form of documentation so that I can backcharge our contractor for security services which was under their contract, or perhaps get a security system for use after the contract is completed and the school is vacated. Also, the contractor requests TRENT to remove their abandoned vehicle from the site.

Sincerely yours,

David Millner, R.A.
